What's in your water?

H₂O, two parts hydrogen and one part oxygen, but what else could be lurking in your water supply?

Naturally occurring **minerals** from the environment

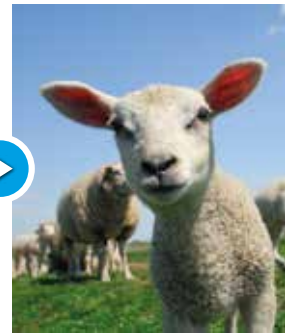

Chlorine and chemicals added during water treatment process

Particles from pipes including **lead, rust** and limescale

Microplastics that are becoming ever present in our oceans

Pollution including **oestrogen** and **coliform bacteria**

Scientists believe we each consume 5g of plastic every week

- that's the equivalent of a credit card.

Over the course of a year, that equates to 12 plastic bags, approximately 150,000 plastic particles.

It's your choice

Take control of the water you drink, cook with and give your family to hydrate.

Remove lead and pesticides that can affect your health

+

60%

of the UK is in a hard water area and suffers the effects of limescale

Did you know?

It can take up to 450 years for a plastic bottle to bio-degrade.

The benefits of filtered water

Experience unlimited access to pure, high-quality water, on demand.

Our direct flow system maximizes water production while minimizing waste, meaning you can enjoy more water with greater efficiency. Just turn the tap and enjoy the endless benefits...

Contaminant-free, pure hydration

Water is an essential part of life, it is recommended that we drink around 8 glasses per day.

We exercise and strive to eat well for our health, so it's vital that the water we drink is pure and free from harmful substances.

The Premier RO effectively reduces contaminants such as; micro organisms, heavy metals and pesticides, leaving you to enjoy clean, safe water.

Hydration on your terms.

Crystal-clear ice and delicious drinks

Experience ice like never before!

With unparalleled clarity, ice cubes made from RO water are free from impurities that can cloud their appearance.

When added to your favourite drinks, these pristine cubes keep your beverages cool, without altering their delicate flavours.

The purest, clearest ice cubes you've ever seen.

Delicious tea without the compromise

Thanks to the superior reverse osmosis filtration, each cup of tea will be the perfect, aromatic experience. Your tea's natural flavours will shine through with every sip.

Similarly, coffee aficionados will appreciate the depth of flavour in every brew. The purity of the water enhances the coffee's richness, allowing the true notes of each blend to emerge for a truly balanced, satisfying cup.

Transform hot drinks into something extraordinary.

Did you know?

Those who live in homes built before the 1970s are at a greater risk of lead consumption, which can be toxic to many organs and tissues.

The perfect solution - a Kinetico Premier RO

Highly efficient

For every 1 litre of rejected water, the system produces 2 litres of filtered water.

High flow rate

Fill your glass in only 5 seconds!

Sustainable and economical

No separate tank (and no more plastic bottles) helps to reduce our reliance on plastic and in turn enable us to protect our planet.

Easy to maintain

Simply lift and remove the magnetic front cover. Rotate and remove old cartridge, then insert and rotate new cartridge.

All-in-one system

Unlike traditional reverse osmosis systems, the Kinetico Premier RO operates without a separate water tank.

Smart technology

Smart LED panel with light and acoustic warning system to ensure you'll always know the quality of your water supply and the status of your filter cartridge life.

Auto flush

The membrane automatically self-cleans, ensuring optimal performance and lifespan.

'Twist-and-Lock' cartridge replacement

Three easy steps: Simply lift and remove the magnetic front cover. Rotate and remove old cartridge, then insert and rotate new cartridge.

Smart Tap

Just a quick glance at the LED ring and you'll know the filter life status.

Your questions answered

What maintenance does it require?

- The pre-filter cartridge needs to be replaced every 12 months.
- The RO membrane needs to be replaced every 36 months.
- The LED display will let you know when the cartridges need to be changed.

Does it need servicing?

It is recommended that your Premier RO is sanitised every 12 months by a Kinetico approved engineer. This will ensure that you maintain maximum efficiency and optimum performance of the filtration system.

Will there be a pressure drop in the flow of water?

There are many factors in your home that may cause a pressure drop. However, a Kinetico Premier RO has been specifically designed not to affect the flow.

How long will my Premier RO last?

Every Kinetico water filter goes through rigorous quality control checks before it leaves the factory. With the auto flush technology (automated self-clean), they have been built to last.

How long before I get filtered water?

As soon as your system is connected up to your mains water supply and your drinking water tap, the filtered water will be ready to drink and available on demand.

premier

RO

The **Kinetico Premier RO** is designed to fit perfectly in any kitchen, regardless of size or shape.

Enjoy superior performance without compromise crystal clear, great tasting water straight from a tap, on demand, 24/7.

Dimensions	
Size (h x d x w)	485 x 415 x 155 mm
Weight	11.5 kg
Flow	
Pressure Range	1 - 4 bar
Production	
Production Rate	2.1 litres/minute
Membrane	3028 litres/day
System	
Power Supply	36 Vdc
External adaptor	230 Vac 50/60 Hz
Temperature Range	5 - 38°C
Tap	Smart Tap

Revolutionary drinking water system.

- Cutting-edge technology with no separate tank.
- Maintenance indicators to show filter life.
- Easy 'twist-and-lock' cartridge replacement.
- Highly efficient - for every 1 litre of rejected water, 2 litres of filtered water is produced.

Unleash a world of new experiences in your kitchen!
